PROJECTS

Niagara College Program Advisory Committees (NCPAC)

[Demo \(Video\)](#) | [GitHub](#)

C#, MVC, Bootstrap, HTML/CSS, LINQ, Entity Frameworks, SQLite

- MVC application designed to assist in the administrative management of the [NC PAC](#).
- I developed the dashboard, member's report, and the registration process of new members from manual to digital.
- I served as the team leader for our group of 5 people, and Azure Hosted for publishing the application.
- Effectively reduced approximately 37% of the client's workload, from converting or manual processes into digital.
- Selected as the winner of the Community Sponsored Project (Winter 2023) in its category (we competed against 5 teams).

Medical Office UWP

[GitHub](#)

C#, XAML, UWP, RESTful, HTTP requests

- I created it because I was confused about how to consume an external API.
- Utilized RESTful interactions to communicate with the API hosted.
- Implemented error handling by creating an ApiException class to process API error responses.

Medical Office API

[GitHub](#)

C#, ASP.NET Core, SQLite, Data Transfer Objects (DTOs), Swagger

- Like the above project, MOAPI was created to gain a better understanding of APIs.
- Utilizes Data Transfer Objects (DTOs) to efficiently handle data communication between the API and the client.
- Implemented functionalities to retrieve information on doctors and patients from the medical office database.

Note: You can find more on my [GitHub profile](#), thank you in advance for your visit.
